DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claim 34, drawn to PLL with loop filter for suppressing components of low phase noise reference oscillator, classified in class 331, subclass 17.
- II. Claim 35, drawn to programmable divider at output of PLL, classified in class 331, subclass 74.
- III. Claim 36, drawn to PLL with frequency and phase detector, classified in class 331, subclass 25.
- IV. Claim 37, drawn to CATV tuner with filter and mixer, classified in class 348, subclass 731.
- V. Claim 38, drawn to set top box, classified in class 725, subclass 100.
- VI. Claim 39, drawn to Television receiver with CATV tuner, classified in class 348, subclass 553.
- VII. Claim 40, drawn to VCR with CATV, classified in class 386, subclass 1.

VIII. Claim 41, drawn to Cable modem, classified in class 725,
subclass 111.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a PLL with suppressed noise. See MPEP § 806.05(d).

3. Inventions I-VIII are unrelated except for I and II as said above. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different devices with different operations, functions and effects.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group (each) is not required for Group (other), restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was not made to Applicant to request an oral election to the above restriction requirement because of the extensive nature of the restriction, and thus one did not result in an election being made.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Mis whose telephone number

is (571)272-1765. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
